DETAILED ACTION

Election/Restrictions

The inventions are distinct, each from the other because of the following reasons:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 14-23, drawn to apparatus of a shear wall panel for a building, classified in class 52, subclass 167.3.
- II. Claims 24-26, drawn to method of making the shear wall for a building, classified in class 52, subclass 741.13.

Inventions I and II are related as apparatus and method. The inventions in this relationship are distinct each from the other because of the following reasons:

Inventions I regarding the apparatus of a shear wall panel for a building and invention II regards to method of making the shear wall for a building. Therefore, these are two separate inventions with different modes of operation, functions (MPEP § 806.05, MPEP § 808.01) are patentably distinct as shown by their mutually exclusive characteristics.

Inventions I and II are related as apparatus and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method is used to make the wall panel for storage.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3635

During a telephone conversation with Mr. Scott Pundsack on May 15, 2003 a provisional election was made to group I claims 14-23 without traverse to prosecute the invention apparatus of a shear wall panel for a building. Affirmation of this election must be made by applicant in replying to this Office action. Claims 24-26 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Response to Amendment

The reply filed on 23 April 2003 is not fully responsive to the prior Office Action because: Since applicant elected species figure 11, and in regard to claims 14-18 and 22-23 drawn to non elected species wherein applicant claiming in regard to **claim 14** the phrase “**at least four continuous diagonal members**”, it means **could be more than four diagonal members wherein figure 11 shows only four diagonal members**, in regard to **claim 17** the shear wall having “**more than four continuous diagonal members**”, In regard to **claim 22** the **vertical members are secured to top or above the shear wall panel**. Therefore, claims 14-18 and 21-23 are no longer consider for further examination.

Allowable Subject Matter

Claims 19-21 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art fail to provided the following applicant's claim invention of shear wall having **four continuous diagonal members secured together end to end to form the polygon** and having the **vertical members connected and secured to vertically rod connectors which extending upwardly from a foundation**.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
